## Contributors and Acknowledgements

The preparation of this report/list was coordinated by the Slovenian National Institute of Public Health (NIJZ).

Additionally, we would like to highlight the invaluable contributions that have gone into preparing the materials discussed in this document. Within this particular work, we would like to thank all Work Package 7 (WP7) partners, who contributed to achieving goals within the *M7.4 Execution of a joint public tender*, especially for their efforts.

Our sincere gratitude goes to the following Work Package 7 partners, who contributed in achieving the third Work Package 7 milestone (M7.4): Judith Benedics, Sandra Ecker, Sophie Hesina (The Federal Ministry of Labour, Social Affairs, Health and Consumer Protection - BMASGK), Gabriele Antony, Rita Kichler (The Austrian National Public Health Institute - GOeG), Dragana Stojisavljević (PHI Institute for Public Health of the Republic of Srpska - PHI-RS), Aida Filipović Hadžiomerađić, Sanela Tukulija (Institute for Public Health of the Federation of Bosnia and Herzegovina - PHI-FBH), Vesselka Duleva, Ekaterina Chikova Iscener (National Center of Public Health and Analyses – NCPHA), Betina Bergmann Madsen, Mette Svendgaard Høgholm, Dennis Lars Olof Steffensen (Copenhagen Municipality - CPH-MUN), Susanna Raulio, Eeva Rantala (Finnish Institute for Health and Welfare - THL), Venetia-Maria Vraila, Eleftheria Papachristou (Institute of Child Health - ICH), Anita Varga, Leonora Zambo (National Institute of Pharmacy and Nutrition - NIPN), Charlene Vassallo (Ministry for Health – MFH) and to Katarzyna Brukała (Medical University of Silesia in Katowice - SUM).

We would like to extend our thanks to the subcontractor Chamber of Commerce and Industry of Slovenia – the owner of the best practice – Catalogue of Foods for their active engagement in the Joint Action within Work Package 7, especially in providing sufficient instructions and information on the Catalogue of Foods to participating Member States and active involvement within bilateral meetings.

## Introduction

The main focus of the Best-ReMaP JA is to adapt, replicate and implement effective health interventions, based on practices that have been proven to work, also in the area of public procurement of healthy food in public settings.

WP7 activities contribute to the Best-ReMaP long-term overall objective to improve food choices for children, thus adding to increased healthy life years at the MS and EU level. Specific objectives of the WP 7 are as following:

- To support the establishment of the intersectoral working group for the public procurement of foods in public institutions, in the participating MS,
- To increase the understanding, knowledge and skills regarding public procurement of food/food products in selected public institutions,
- To enable more choice of quality food stuffs for balanced menus in selected public institutions, from at least one type of public institution (types of public institutions: kindergartens, schools, retirement homes, hospitals), by piloting the Catalogue of foods in the public procurement procedure,
- To recommend further institutionalised implementation of the public procurement procedures for foods, based on quality standards, in EU MS.

One of the major task is Task 7.3 Pilot procurement tool and joint public tender. Objective of the Task is following:

*Task 7.3 PILOT PROCUREMENT TOOL AND JOINT PUBLIC TENDER*  
*Task Leader: NIJZ, Participating partners: BMASGK, GoeG, MCA, PHI-FBH, PHI-RS, NCPHA, CPH-MUN, THL, ICH, SU, MFH*

*Task 7.3.3 Joint execution of public tender, with the implementation practically organized by the selected subcontractor, with harmonized timing among all the participating MS - one testing public tender executed, for up to three priority food groups; comparative testing of the Catalogue of foods in participating MS – to demonstrate the functioning of the Catalogue of foods within different MS and highlight the possible linkages.*

*The Catalogue of foods contains database with generic or more specific data for different food groups. The generic database includes all previously known food titles in menus (such as full-fat cottage cheese), subcategories and product types, which will be then later in the process replaced by the products of choice, entering the menus.*

*Task 7.3.4 Development of the approach towards the EU market analysis with the aim to compose the joint EU list of food products, where relevant, based on the participating MS lists (as mentioned above), with support of a potential procurement officers network. If feasible, joint EU list of food products will be embedded in JRC food database. This would enable transparent overview of food products and their traceability. All partners (except Finland) have entered data for food products in the milk and milk products food group (Finland chose fish and fish products), the lists of food products will be thoroughly reviewed, while paying attention to possible overlaps or product matches, that could be included in the joint EU list of food products.*

---

Within 7.3.2 Task eight Member States have participated: Austria, Bosnia and Herzegovina, Denmark, Finland, Greece, Hungary, Poland and Malta. All Member States created the proforma invoice for food types in the milk and milk products food group (except for Finland, who worked with the food group fish and fish products).

## Execution of a joint public tender

The purpose of the proforma invoice is to generate a public tender document, to which different food providers can apply with their products, to connect participating countries with their national producers/providers and obtain information about their products. The purpose is also to demonstrate the functioning of the Catalogue of foods within different MS and highlight the possible linkages. The exported Excel files (proforma invoice/public tender document) with the filled-in data of the partners and the food providers, form a part of the report. They are located in the *Attachments* chapter.

WP7 leaders and CCIS provided constant support in the implementation of the task through bilateral meetings (meetings key notes added below in the chapter Attachments) and advice on finding and connecting Member States with relevant stakeholders in their country. Partners had to design food types in the Catalogue by November 2022 (which were included in the previous Milestone 7.3 Pilot protocol development). From November 2022 to mid-March 2023 partners then had to create a public tender document/proforma invoice in the form of an Excel file (direct printout from the Catalogue of foods) and establish contacts with food producers. The selected food producers, who have shown willingness to cooperate, then ostensibly applied for the tender/to the public tender document with the products they offer for various food types in the proforma invoice. Missing data on some food products was collected from the websites of the food producers.

---

## Conclusion

The process of preparation of the pilot public tender within WP7 has allowed many partners to experience how different and separate are the state regulations concerning public food procurement among participated countries.

The subcontractor, Slovenian Chamber of Commerce and Industry, organized bilateral meetings with every Member State, except Finland, in order to support individual participating countries. Finland did not feel the need to have a bilateral meeting because they completed the task related to the pilot earlier (i.e. the creation of food catalogue and the creation, export and filling of the tender document). The bilateral meetings were intended for countries to present created and filled-out sets/lots in the Excel sheets. Partners had time to collect the data for filling-out the proforma invoice/public tender document until mid-March. Products collected in the Catalogue could be used for the EU list of food products and will make a uniform list for European countries.

Bilateral meetings with Chamber of Commerce and Industry of Slovenia (CCIS) were devoted to reviewing the sets, and to help partners with additional questions. Countries had the most difficulty in importing data from Excel spreadsheet to the Catalogue and vice versa, exporting data into an Excel spreadsheet, accessing food types (inserting estimated quantity, price, value), creating sets and creating public tender from food types. CCIS provided support to all countries through all meetings and via email, and also provided all the necessary instructions. As part of the bilateral meetings, partners were able to explore the principle of how the Catalogue works, prepare sets/lots, export Excel sheets (proforma invoice/public tender document) and forward them to the selected food providers. The next step thus represents simulation of the public tenders.

Partners rate the usefulness of the Catalogue of Foods app for their needs in public food procurement, from moderately useful to slightly useful. The main advantages, drawbacks and the main challenges in using Catalogue of Foods app for public food procurement in public settings, which have been identified in the participating countries are:

- **The main advantages:**

- Digitalizing the tender process is an advantage, as this can reduce administrative work for procurement officers
- The Catalogue of Foods may be beneficial for small-scale food procurement for settings, such as school canteens
- The Catalogue is likely beneficial in settings where the public procurement and competitive tendering processes are not yet digitalised and that do not have online databases that provide product information on all food products on the market
- It is satisfying that we were able to use the tool and apply it to local products

- 
- It facilitated the process and it is transparent
  - Nutrition information is available therefore aids to make better food choices
  - **The main drawbacks:**
    - It is time-consuming for suppliers to enter data into the Catalogue of Food
    - There is a lot of information that needs to be approved
    - The current categorisation of goods does not apply in Denmark
    - The process is not made easier for the bidder
    - We do not have access to the back-end which is necessary for integration
    - Learning to use the Catalogue of Foods requires substantial time and effort even for an individual with a PhD-level education and advanced IT and English language skills; it is very complex to use
    - Translating the Catalogue of Foods in national language and providing comprehensive training and local support for providers and public organisations
    - Constant monitoring of new food products is needed
    - It is a country-specific tool. It is very difficult to adapt it to the requirements of other countries.
    - This tool is for countries that have a developed public procurement system.
  - **The main challenges:**
    - Asking the suppliers to type in the information as they already type in their information in another system and therefore it can be considered double work
    - To make sure that all products are available in the Catalogue
    - The Catalogue would need substantial modifications and restructuring. Such changes would require that the source of the application is open, allowing member states to freely develop the tool further to fit their local needs.
    - The use of certificates in the Catalogue remains unclear
    - Public procurers cannot expect all suppliers to register to a certain service such as the Catalogue of Foods particularly if registering is subject to a charge. Competitive tendering must be open to all suppliers that meet statutory requirements and set procurement criteria.
    - Suppliers cannot be required to enter in the application any data that can be considered business secrets. Hence, included data fields must be carefully considered.

- 
- The Catalogue does not work for non-branded food products, such as wild fish, berries, fruits, or vegetables that do not have EAN or ordering codes and that are typically procured directly from local providers.
  - A mobile version of the Catalogue would be helpful in remote work and while travelling.

Partners emphasized the added value of inter-sectoral cooperation, which is knowledge sharing, sharing of resources, learning from one another, connecting participants and potential collaborations. Starting discussions can slowly initiate changes. Involvement of a broad range of stakeholders from the very beginning of activities with the Catalogue can be used like a baseline with challenges, and the added value represents has been the reflections that followed with the shared perspectives from the participants. At the end of the task, the participating countries shared the opinion that the cooperation with public institutions and national distributors proved to be successful, fruitful and something that is beneficial for both sides and that it is certain that the Best ReMaP project has positively supported and developed the inter-sectoral cooperation.

### Meeting minutes of bilateral meetings with NIJZ, CCIS-CAFE and MSs

Member State	Date of the meeting
Austria	February 14th, 2023
Bosnia and Herzegovina with Republic Srpska	February 6th, 2023
Denmark	February 2nd, 2023
Greece	February 2nd, 2023
Hungary	February 7th, 2023
Malta	February 3rd, 2023
Poland	February 7th, 2023

## Bilateral meeting with Austria

**Organizer:** CCIS and NIJZ

**Date and time:** February 14th, 2023 at 10:00 (CET)

**Meeting location:** Microsoft Teams

**Present:** Sandra Ecker, Judith Benedics, Sophie Hesina, Gabriele Antony, Barbara Lončarek, Petra Kravos

### Agenda

The food types and sets/lots in the Catalogue have been already created. Now excel sheets must be sent to dairy providers to enter data about their products. Austrian team has already created tender, but they will not be sending sheets to the producers. They will fulfil them by themselves. Barbara then described how to insert and import the products from the table. Sophie asked a question how many products should be in a tender. CCIS advises that 2-3 providers/suppliers are included in the public tender. Barbara explained that products collected in the Catalogue will be used for the EU list of food products and make a uniform list for European countries.

When the tender is fulfilled, the partners will forward it to CCIS and NIJZ. Next step will be making criteria for using the most suitable suppliers. This will be presented at the workshop in Ljubljana organized in April (12th - 13th of April).

## Bilateral meeting with Bosnia and Herzegovina with Republic of Srpska

**Organizer:** CCIS and NIJZ

**Date and time:** February 6th, 2023 at 13:00 (CET)

**Meeting location:** Microsoft Teams

**Present:** Sanela Tukulija, Aida Filipović Hadziomeragić, Barbara Lončarek, Polona Kamenšek

### Agenda

The purpose of the meeting was to go over the tasks. Partners need to prepare sets in Excel sheets out of food types and send them to dairy companies. Selected producers will have time to fill them until the end of March. Bosnian team had problems with importing Excel file in the Catalogue. Barbara will look at the Excel document.

Barbara explains that products are collected in the Catalogue for different tasks. One of them is for the EU list of food products (combine all the products in one list) and make a uniform list for European countries.

At the next WP7 partners meeting (3rd of March) partners will present the process on this task. In April NIJZ will organize the workshop in Ljubljana (12th - 13th of April).

## Bilateral meeting with Denmark

**Organizer:** CCIS and NIJZ

**Date and time:** February 2nd, 2023 at 13:00 (CET)

**Meeting location:** Microsoft Teams

**Present:** Dennis Lars Olof Steffensen, Barbara Lončarek, Polona Kamenšek

### Agenda

The purpose of the meeting was to go over the tasks. Partners need to prepare sets in Excel sheets and send them to dairy companies. Selected producers will have time to fill them until the end of March. Dennis shared that they already received the Excel sheet from the producer. The task is completed.

Dennis had a question about column “quality schemes”, Barbara explained it can be related to certificates, organic products, higher quality, origin of the product...

Barbara explained that products collected in the Catalogue will be used for the EU list of food products and make a uniform list for European countries.

At the next WP7 partners meeting (3rd of March) partners will present the process of this task. In April NIJZ will organize the workshop in Ljubljana (12th - 13th of April).

## Bilateral meeting with Greece

**Organizer:** CCIS and NIJZ

**Date and time:** February 2nd, 2023 at 9:00 (CET)

**Meeting location:** Microsoft Teams

**Present:** Eleftheria Papachristou, Venetia Vraila, Barbara Lončarek, Petra Kravos

### Agenda

Barbara started the meeting by asking the Greek team if they have already prepared sets in Excel sheets and sent them to dairy companies. Selected producers will have time to fulfil them until the end of March. The Greek team has already done everything, but they are still waiting for answers from the producers. Eleftheria informs that three companies have decided to cooperate.

Eleftheria is interested in what we will do with these collected products in the Catalogue. Barbara explains that products are collected in the Catalogue for different tasks. One of them is for the EU list of food products (combine all the products in one list) and make a uniform list for European countries. Eleftheria asked a question if the brand name of the product will be visible in the list and if the information of the product will be used only for the purpose of the Best ReMaP project. All the information will be used only for Best ReMaP WP7 pilot.

At the next WP7 partners meeting (3rd of March) partners will present the process on this task. In April NIJZ will organize the workshop in Ljubljana (12th - 13th of April). Because of their Easter holidays, the Greek team will not be able to attend the workshops. The workshop will also be organized in a hybrid format.

## Bilateral meeting with Hungary

**Organizer:** CCIS and NIJZ

**Date and time:** February 7th, 2023 at 13:00 (CET)

**Meeting location:** Microsoft Teams

**Present:** Leonora Zambo, Anita Varga, Barbara Lončarek, Polona Kamenšek

### Agenda

The purpose of the meeting was to go over the tasks. Partners need to prepare sets in Excel sheet out of food types-create public tender and sent them to dairy companies. Selected producers will have time to fill them until the end of March. Hungary team shared the screen and showed the Excel sheet, they made some changes, Barbara suggested to send it to approximately 3 providers. Barbara explained what is expected to be filled in the Excel sheet by providers.

At the next WP7 partners meeting (3rd of March) partners will present the process on this task. In April NIJZ will organize the workshop in Ljubljana (12th - 13th of April).

## Bilateral meeting with Malta

**Organizer:** CCIS and NIJZ

**Date and time:** February 3rd, 2023 at 9:00 (CET)

**Meeting location:** Microsoft Teams

**Present:** Charlene Vassallo, Barbara Lončarek, Petra Kravos

### Agenda

Charlene presented created sets in the Catalogue and asked questions about product quantity. Barbara then presented the amount of packaging for products (quantity in kilograms or liters can be used).

If the selected company does not provide the price of the products by the end of February, Charlene will visit the supermarket herself and enter the product prices in this way.

Barbara presented that at the next WP7 partners meeting (3rd of March) partners will present the process on this task. Partners have time until the end of March to fulfil the table with the information from the producers. In April NIJZ will organize the workshop in Ljubljana (12th - 13th of April). The workshop will also be organized in a hybrid format. Charlene mentions that it would be good if they receive the agenda for the workshops beforehand. She also expressed concerns about the cost of the plane ticket. Namely they will have to fly from Malta first to France and only then to Slovenia.

## Bilateral meeting with Poland

**Organizer:** CCIS and NIJZ

**Date and time:** February 7th, 2023 at 9:00 (CET)

**Meeting location:** Microsoft Teams

**Present:** Barbara Lončarek, Petra Kravos

### Agenda

Katarzyna was unable to join the meeting. Petra presented to Barbara the email sent by Katarzyna. Katarzyna described that due to national regulations, the path in Poland is a bit different (in Poland orders are handled by wholesalers). She contacted the producers, but since the usefulness of this solution is limited for them, she gathered a list of products and slowly introduced them to the application. Katarzyna is wondering if she can prepare some excel file (and what it should look like) to load all these products at once.

Barbara announced that the CCIS has contacted the Poland Chamber of Commerce. It was agreed that Barbara will respond to Katarzyna and provide her further information.
